FACTORY EQUIPMENT

Creating products of constantly high quality that exceed our customers' expectations and perform over years of intensive use requires modern production facilities. All our products are produced utilizing latest production routines and machinery. Extensive investments into production facilities, quality testing and employee training have created a solid basis for our business. Foresighted planning means that we are ready for future challenges and increasing demand.

Each of the two major component groups: aluminum profiles and acrylic & ABS sheet are being manufactured on their own purpose built manufacturing facilities. After being carefully inspected, high quality tempered glass, numerous styles of aluminum profiles in a range of different finishes and durable hardware come together in the packing and delivery area.

Aluminium extrusion

Automatic hole drilling

Automated aluminum anodizing

SHOWER SCREEN

02

SHOWER SCREEN

—

Space is vast as the sea. Although you are at home,
as if you experience the charm of sea.
Individual space aesthetic feeling and vivid texture sends out
clear faddish breather like an aesthetic art to
carry people's surprised sight quietly.
